ELSEVIER

Volume 188, Numbers 1–2, September 1995

WEAR

Contents

A dynamic analysis of tapered roller bearing under fully flooded conditions
Part 1: Theoretical formulation 1
S. Creţu, I. Bercea, N. Mitu (Iaşi, Romania)

A dynamic analysis of tapered roller bearings under fully flooded conditions
Part 2: Results 11
S. Creţu, N. Mitu, I. Bercea (Iaşi, Romania)

Mechanism of rubber abrasion
Part 3: how is friction linked to fracture in rubber abrasion? 19
Y. Fukahori, H. Yamazaki (Tokyo, Japan)

Friction and wear characteristics of P-containing antiwear and extreme pressure additives in the sliding of steel against aluminum alloy 27
W. Yong, X. Qunji (Lanzhou, China)

The effect of circulating fluidized bed particle characteristics on erosion of 1020 carbon steel 33
B.A. Lindsley, A.R. Marder (Bethlehem, PA, USA), J.J. Lewnard (Allentown, PA, USA)

Erosion–corrosion of coatings by biomass-fired boiler fly ash 40
B.-Q. Wang (Richmond, VA, USA)

Stochastic contact model of rough frictional heating surfaces in mixed friction conditions 49
A.A. Yevtushenko, E.G. Ivanyk (Lviv, Ukraine)

The correlation among the tribological characteristic parameters of rare earth trifluorides and their electron structures, bond parameters, and thermodynamic parameters. 56
Y. Lian, L. Yu, Q. Xue (Lanzhou, China)

Study of wear of as-cast and heat-treated spheroidal graphite cast iron under dry sliding conditions 61
M.A. Islam, A.S.M.A. Haseeb, A.S.W. Kurny (Dhaka, Bangladesh)

Analytical approach for the determination of the dynamic coefficients of hybrid bearings 66
Y. Tian, M. Bonis (Compiègne, France)

On machining rate of hydrodynamic polishing process 77
Y.-T. Su, S.-Y. Wang (Koahsiung, Taiwan), J.-S. Hsiau (Kaohsiung, Taiwan)

A deductive theory of friction 88
J.F. Ganghoffer, J. Schultz (Mulhouse, France)

Diagnosis of bearing problem of synchronous condenser—an experimental and theoretical investigation 97
H. Prashad (Hyderabad, India)

Bed thickness and particle size distribution in three-body abrasion 102
M.A. Verspui, G. de With, P.G.Th. Van der Varst, M. Buijs (Eindhoven, Netherlands)

Subsurface deformation of steel by solid particle impact investigated by ion beam slope cutting and scanning electron microscopy 108
W. Hübner (Berlin, Germany), W. Hauffe (Dresden, Germany)

Friction and tool wear in nano-scale machining—a molecular dynamics approach 115
K. Maekawa, A. Itoh (Hitachi, Japan)

Development of a graded TiCN coating for cemented carbide cutting tools—a design approach 123
K. Narasimhan, S. Prasad Boppana, D.G. Bhat (Troy, MI, USA)

Oxidational wear of TiN coatings on tool steel and nitrided tool steel in unlubricated fretting 130
H. Mohrbacher, B. Blanpain, J.P. Celis, J.R. Roos (Leuven, Belgium), L. Stals, M. Van Stappen (Diepenbeek, Belgium)

Elsevier Science S.A.

Description of the energy level of tribologically stressed greases 138
E. Kuhn (Hamburg, Germany)

The effect of erosional wear on strength and residual stress during shaping of ceramic multilayer capacitors 142
G. de With, N. Sweegers (Eindhoven, Netherlands)

Wear characteristics of PDC pin and hybrid core bits in rock drilling 150
A. Ersoy, M.D. Waller (Nottingham, UK)

A model of brittle-dominated wear due to delayed fracture (vertical crack growth) 166
L. Rapoport, R.L. Salganik, V.A. Gotlib (Holon, Israel)

Impact wear characteristics of engine valve and valve seat insert materials at high temperature (impact wear tests of austenitic heat-resistant steel SUH36 against Fe-base sintered alloy using plane specimens) 175
T. Ootani, N. Yahata (Tokyo, Japan), A. Fujiki, A. Ehira (Yokohama, Japan)

Short Communication

Wear behaviour of AA6061 aluminium alloy and its composites 185
A.B. Gurcan, T.N. Baker (Glasgow, UK)
